Barriers
in Swansea which are sub-standard

The table below lists the barriers on ATNM routes through which tricycles, wheelchairs, bikes with trailers or tandems either cannot pass or can only do so with difficulty. They are identified by the characters used on the four maps on the Infrastructure page of www.wheelrights.org.uk followed by a number, eg SA-1, which relates them to the photos. The table will be updated as the sub-standard barriers are ether replaced or removed. (Last update: 20 March 2023.)

The barriers are listed clockwise round Swansea: SW, NW, NE, SE.

Id	Location	Grid Ref.	The problem.
NCR43-1	Clydach, Vardre Rd crossing.	695014	Bollards (both sides) too close.
